**Exercise (Figma Basics)**

In this exercise, we will explore how to create a Login, Signup, Homepage and additional in Figma using ready-made templates. These templates will help streamline the design process and provide a foundation for your web or app project.

**Requirements**
- Create a Login page
- Create a Signup page
- Design a Homepage
- Create additional page (ex. product page ,project table page)
- Understand how to customize and edit templates

**Figma website templates:**
1. Figma Community
2. FigmaCrush
3. Captain design

You have the flexibility to utilize any website of your choice.
